

How to Clean Polywood

DEEP CLEANING

SUPPLIES NEEDED

- A pressure washer (rated no higher than 1,500 psi) equipped with a 40-degree fan tip

INSTRUCTIONS

- Spray all areas of your furniture with slow, even sweeps, keeping the nozzle about 8 inches away from the surface.
- If any stubborn spots remain, follow the Clean & Sanitize steps to remove them.

TIPS

- Always keep the pressure washer's wand moving. Spraying one spot continuously can cause gouges and other damage.
- Wear goggles, gloves, a facemask, boots, and ear protection when using a pressure washer.
